

TAC844

hard water, easy solution.

pure **water** point
exceptional water for your business & home

How does ScaleStop work?

As incoming water passes through the TAC media, dissolved calcium and magnesium ions are converted into harmless microscopic CaCO₃ crystals which do not form as limescale as they travel through the water system.

Specification

- 46 litres a minute continuous flow rate TAC salt free limescale prevention tank system.
- Featuring Pentair composite tank with options of 1" Clack bypass head or standard IN/OUT head with 3/4" or 1" quick release connections.
- Cost and maintenance free for 3 years.
- Simply change media using an exchange pack at the end of year 3.
